

QUICK COMMERCE ENTREPRENEUR CHALLENGE

THE CHALLENGE

Identify the **next big category-specific quick commerce opportunity** in India.

Quick commerce is no longer only about groceries. New-age companies are now building fast delivery and quick-service models around specific categories like food, fashion, home services, premium groceries, beauty, personal care, pet care, flowers, electronics accessories, and daily-use products.

Examples include:

1. **Swish** for quick food delivery
2. **Slikk** for fast fashion delivery
3. **Pronto** for instant home services
4. **FirstClub** for quality-led premium groceries
5. **Nykaa Now** for beauty and personal care quick delivery

Your challenge is to study category-specific quick commerce examples and identify the next underserved category where speed, curation, trust, and repeat behaviour can create a new consumer habit.

But this is not about copying Blinkit, Zepto, or Swiggy Instamart.

Your job is to find a focused category where customers currently face delay, confusion, poor discovery, trust issues, or inconvenience, and build a quick commerce venture around it.

Your goal is simple: **Find a category where fast access does not just save time, but changes how people buy, use, and repeat the product or service.**

You will build:

1. A study of 3 to 5 successful or emerging category-specific quick commerce examples
2. Key learnings from examples like Swish, Slikk, Pronto, FirstClub, Nykaa Now, or similar brands
3. A new category opportunity you believe is underserved
4. Customer insight explaining why this category needs quick commerce
5. Use cases and urgency moments where customers need fast access
6. Target audience and city/customer segment
7. Product or service assortment strategy

8. Inventory, supply, or fulfilment logic
9. Pricing, margins, and basic unit economics
10. Delivery or service promise and operational model
11. App or ordering experience flow
12. Go-to-market campaign
13. First 1,000 customers strategy
14. Retention and repeat-order strategy
15. A deck explaining your complete quick commerce venture strategy

For additional brownie points, you may also create:

1. App screen mockups
2. Category landing page
3. Sample assortment list
4. Dark store, hub, or fulfilment layout
5. Delivery or service flow map
6. Launch campaign creatives
7. Sample performance ads
8. Referral or subscription model
9. Revenue projection
10. City-wise rollout plan

VENTURE ELIGIBILITY

To be eligible for submission, your quick commerce venture must meet the following conditions:

1. It must focus on one specific category or closely related category cluster.
2. It must not simply copy Blinkit, Zepto, Swiggy Instamart, or other general quick commerce platforms.
3. It must study at least 3 existing or emerging category-specific quick commerce or quick-service examples.
4. It must identify a clear underserved customer problem.
5. It must explain why speed, convenience, trust, or curation matters in this category.
6. It must include clear urgency moments and repeat-use cases.
7. It must include a practical product or service assortment strategy.
8. It must include basic unit economics such as average order value, gross margin, delivery cost, packaging cost, service cost, and contribution margin.
9. It must include an operational model explaining inventory, supply, storage, delivery radius, fulfilment, service partners, or execution logic.
10. It must include a go-to-market campaign for acquiring the first customers.
11. It must include a retention strategy that encourages repeat ordering.
12. It must be commercially realistic and operationally possible in at least one city or neighbourhood.
13. It must avoid unsafe, restricted, illegal, or age-restricted categories.
14. It must not promote unsafe speed promises, rash delivery behaviour, or unrealistic delivery expectations.

The Question You Are Trying to Answer

Can I identify the next category where fast access, smart assortment, trust, curation, and repeat behaviour can create a new consumer habit, and turn it into a commercially viable quick commerce venture?

FINAL SUBMISSION

Submit the following:

1. **Presentation/deck** explaining your category research, opportunity, customer insight, business model, operations, and launch plan
 - a. **3 to 5 category-specific quick commerce or quick-service examples** and what you learned from them
 - b. **Chosen category opportunity** with clear problem, audience, urgency moments, and repeat-use cases
 - c. **Product or service assortment strategy** showing what will be offered and why
 - d. **App or ordering flow** explaining how customers discover, order, receive, and reorder
 - e. **Basic unit economics** for the core order or service model
 - f. **Operations plan** covering inventory, supply, storage, delivery radius, fulfilment, partners, and delivery/service promise
 - g. **Go-to-market campaign** for the first 30 days
 - h. **First 1,000 customers strategy**
 - i. **Retention and repeat-order strategies**
2. **Bonus:** App mockups, landing page, assortment list, fulfilment layout, delivery map, campaign creatives, referral model, subscription model, or revenue projection
3. Date of Submission: **23rd June 2026**
