

EVENTS & EXPERIENCE CHALLENGE

THE CHALLENGE

Plan **experience zones** for the next edition of **Zomaland**.

Zomaland already brings together food, music, entertainment, games, creators, brands, and audiences. Your challenge is to design new experience zones that make the festival more exciting, more shareable, and more memorable.

You will not just suggest “fun stalls.” Your experience zones should improve the visitor journey across the festival; your job is to design experiences that people would want to enter, participate in, record, post, and talk about after the event.

Your goal is to design experience zones that make Zomaland feel less like an event people attend and more like a world people step into.

You will build:

1. A clear audience insight
2. A theme or creative direction for the experience zones
3. 3 to 5 original experience zone concepts
4. The purpose of each zone
5. A basic layout or festival map showing where the zones fit
6. Brand/sponsor integration ideas
7. Content and social media moments built into each zone
8. A deck explaining your complete experience strategy

For additional brownie points, you may also create:

1. Visual mockups of the zones
2. A walkthrough video or animated presentation
3. AI-generated reference images
4. A sample event map
5. A budget estimate
6. A sample Instagram reel concept promoting one of the zones

EXPERIENCE ELIGIBILITY

To be eligible for submission, your experience strategy must meet the following conditions:

1. It must be designed specifically for Zomaland.
2. It must include at least 3 original experience zone ideas.
3. Each zone must have a clear purpose, not just decoration.
4. Each zone must include a visitor interaction or participation element.
5. Each zone must include at least one content-worthy or shareable moment.
6. The experience must be safe, practical, and possible to execute at a live festival.
7. The plan must consider crowd movement, waiting time, staffing, and basic operations.
8. The brand integrations must feel natural and not forced.
9. The experience should appeal to young festival-goers, food lovers, friend groups, creators, and families.
10. The final idea should make Zomaland feel more memorable, not more cluttered.

The Question You Are Trying to Answer

How can I design experience zones that make people spend more time, create more content, discover more food, interact with more brands, and remember Zomaland long after the festival ends?

FINAL SUBMISSION

Submit the following:

1. **Presentation/deck** explaining your experience zone strategy including
 - a. **3 to 5 experience zone concepts** with purpose, audience insight, and visitor journey
 - b. **Basic festival layout or map** showing where the zones would be placed
 - c. **Visual references or mockups** for each zone
 - d. **Brand/sponsor integration ideas**
 - e. **Operational plan** covering space, staff, queues, safety, and execution needs
2. **Bonus:** AI-generated zone visuals, walkthrough video, budget estimate, or promotional reel concept
3. Date of Submission: **23rd June 2026**
