

IMPACT ENTREPRENEUR CHALLENGE

THE CHALLENGE

Build a **cause-based impact venture** that solves a real social, environmental, or community problem.

Your challenge is to choose a cause you care about, identify a specific problem within that cause, and turn it into a venture that can create real impact while also being financially sustainable.

This is not a charity project. This is not just an awareness campaign. This is not about saying “people should care.”

Your job is to build a practical venture that can reach people, solve a problem, generate revenue, measure impact, and grow over time.

Your cause could be related to food waste, education access, women’s safety, menstrual health, e-waste, plastic waste, clean water, animal welfare, mental wellness, disability access, senior care, rural livelihoods, public hygiene, road safety, climate action, local artisans, or any other meaningful problem you want to solve.

Your goal is simple: **Build an impact venture where doing good and building a sustainable business are not separate goals, they support each other.**

You will build:

1. A clear cause and problem statement
2. A target audience and beneficiary insight
3. A venture idea that solves the problem
4. Product, service, platform, marketplace, community, or hybrid model
5. Revenue model and pricing strategy
6. Basic unit economics
7. Go-to-market campaign
8. First 100 customers/users/beneficiaries strategy
9. Partnership strategy with brands, NGOs, colleges, local businesses, government bodies, or communities
10. Operations plan explaining how the venture will actually work
11. Impact measurement plan
12. Risks, challenges, and trust/safety considerations
13. A deck explaining your complete impact venture strategy

For additional brownie points, you may also create:

1. Landing page or website mockup
2. App or platform wireframes
3. WhatsApp/community flow
4. Product or service mockups
5. Campaign creatives
6. Field pilot plan
7. Impact dashboard
8. Revenue projection
9. Partnership pitch deck
10. Sample customer journey

VENTURE ELIGIBILITY

To be eligible for submission, your impact venture must meet the following conditions:

1. It must be built around a clear social, environmental, or community cause.
2. It must solve a specific problem, not a vague issue like “poverty” or “pollution” in general.
3. It must have a clear target audience, customer, and beneficiary.
4. It must include a business model, not only donations or charity.
5. It must include pricing, revenue streams, and basic unit economics.
6. It must include a go-to-market campaign explaining how the venture will reach its first users or customers.
7. It must include an operations plan explaining how the solution will actually be delivered.
8. It must include partnerships needed to make the venture work.
9. It must include measurable impact outcomes.
10. It must be practical enough to test through a small pilot.
11. It must be scalable beyond the first community, campus, city, or customer group.
12. It must be ethical, safe, and respectful toward the people or communities it aims to serve.

The Question You Are Trying to Answer

Can I take a cause I care about and turn it into a real venture; with a solution, business model, unit economics, go-to-market plan, operations, and measurable impact?

FINAL SUBMISSION

Submit the following:

1. **Presentation/deck** explaining your cause, problem, audience, solution, business model, and impact strategy
 - a. **Venture concept** explaining what you are building and how it solves the problem
 - b. **Target audience and beneficiary insight**
 - c. **Revenue model and pricing strategy**
 - d. **Basic unit economics** for the core product, service, or transaction
 - e. **Go-to-market campaign** for acquiring the first users, customers, or beneficiaries
 - f. **First 100 users/customers/beneficiaries strategy**
 - g. **Operations plan** explaining how the venture will actually function
 - h. **Partnership strategy** with relevant brands, NGOs, communities, colleges, local businesses, or institutions

- i. **Impact measurement plan** explaining what success looks like beyond revenue
2. **Bonus:** Landing page, app wireframes, campaign creatives, product mockups, pilot plan, impact dashboard, partnership pitch, or revenue projection
3. Submission Date **23 June 2026**
